

The inhabitants of Adi-Shegala Administrative area lauded the service being rendered by the health station in the locality. They further indicated that they have become beneficiaries of a number of social service facilities. Goluj, 26 October 2012 – The inhabitants of Adi-Shegala Administrative area lauded the service being rendered by the health station in the locality. They further indicated that they have become beneficiaries of a number of social service facilities.

Among the inhabitants, Ms. Fatima Osman and Mr. Mohammed Aman Nasser said that the health station is playing significant role in safeguarding community health, and that impressive accomplishment has been registered as regards malaria control in the locality. They further expressed appreciation for the commitment of health personnel there.

Aymen Abraha, Health Assistant in the health center, said that community health representatives are playing vital role in promoting community health in general and prevention of communicable diseases in particular. Accordingly, the achievement regarding prevention of malaria infection during the rainy season was ensured through popular participation.

Adi-Shegala village is located 22 Km. south-east of Goluj semi-urban center.
