

Students engaged in the summer work program are carrying out effective task, according to Mr. Teklemariam Haile, an expert in reforestation and wild life in the sub-zone.

Adi-Quala, 8 August 2010 – Students engaged in the summer work program are carrying out effective task, according to Mr. Teklemariam Haile, an expert in reforestation and wild life in the sub-zone.

He said that the students assigned in different areas have been conducting soil and water conservation activities starting July 6th.

The students have so far constructed over 190Km of terraces, over 7,600 cubic meter embankment in addition to digging holes for planting tree seedling.

One of the students, Major Ogbaselassie called on the public and the administrator to preserve and maintain the task carried out by the students.
