

Assembly members and village elders in Nacfa town said that the achievements the town has registered as regards expansion of social services and infrastructure development amply demonstrate the Government's vigorous endeavors in developing the sub-zone in general and the town in particular.

Nacfa, 9 August 2010 - Assembly members and village elders in Nacfa town said that the achievements the town has registered as regards expansion of social services and infrastructure development amply demonstrate the Government's vigorous endeavors in developing the sub-zone in general and the town in particular.

They noted that the town is showing rapid urbanization and that the construction of residential housing complexes are impressive both in terms of quality and quantity. They went on to say that the local inhabitants have already got easy access to various reliable services such as potable water supply, education, health and the like.

The Assembly members and village elders further indicated that the increase of mobile phone service to 24 hours would also provide added impetus to the pace of urbanization in the town. Stating that the construction of the Nacfa-Afabet road through Roddab Construction Company would play major role in easing transport problem, they said that the 27,000 tree seedlings along the streets of the town have due contribution to make in maintaining the charm of the town.

Moreover, they explained that the newly designated number of land plots for residential and business purposes in accordance with the mapped out master plan would back up the ongoing endeavors
